Key

Application Area

Suitable for outdoor use.

Suitable for high foot traffic areas.

Certifications

Compliant with fire protection classifications

Compliant with antistatic classification EN 14041

Anti-microbial properties as tested by AATCC TM 30, Part 111 test

Conforms to current BS8300 DDA Regulations

Product Benefits

Product has properties that reduce its impact on the environment

Guaranteed for specified number of years

Can be cut to custom shapes

Can be recycled

Available with rounded corners

Can be designed with custom artwork

Highly absorbent surface

Suitable for underfloor heating

Colorfast and Lightfast properties

Made in Europe

Cleaning and Washability

Limited washability.

Machine washable

Tumble dry on low, medium and high temperatures

Do not tumble dry

Lay flat to dry

Can be vacuum cleaned

High-pressure wash cleaning

Clean using steam or spray extraction methods

Can be cleaned with carpet cleaning machines

Affiliates and Accreditations

Kleen-Tex is a member of various laundry institutions and textile associations and is affiliated with multiple reputable promotional organisations.

HOHENSTEIN

Expertly manufacturing exceptional products

Make more of your floor

For over 55 years, Kleen-Tex has been at the forefront of manufacturing floor mats and matting solutions for commercial applications, setting the industry standard for quality and performance.

Our unwavering commitment to exceptional customer service has earned us a global reputation as one of the premier manufacturers operating across five continents.

With our extensive knowledge in textiles and design, floor care, pedestrian safety, entrance systems, and specialist floor mat solutions, we possess unparalleled expertise that enables us to offer an extensive range of mats suitable for any application. These mats not only serve a functional purpose but can also be utilized to promote and create personalized messages for customers and employees, fostering a unique and engaging experience.

Our strong manufacturing presence, with three operational locations in Europe and one in Thailand, provides our customers with products through corporate and sales office in LaGrange, GA. With a legacy of excellence, Kleen-Tex continues to deliver innovative and durable matting solutions that surpass expectations, cementing our position as an industry leader.

At Kleen-Tex, we promise:

Over 55 years of experience

Excellent customer service and delivery

Certification and accreditation from world class institutes

European manufacturing

Continuous commitment to product innovation

Extensive bespoke design capabilities

Matting systems that deliver durability and longevity

Top quality launderable matting systems

Optimise Your Floors in 3 Simple Steps

The Ultimate Entrance System for your Building

Did you know that on average, 80% of dirt gets into a building through its main entrance?

By strategically installing mats at key locations throughout your building, you can significantly reduce the transfer of dirt and moisture, and as a result, dramatically reduce your cleaning costs.

No one wipes their feet when entering a commercial building so the more footsteps that land on mats, the more dirt is stopped at the door.

Over the last 50 years, we have developed and advocated a three-mat system to successfully entrap dirt and moisture before it enters your building.

~40%
of your cleaning budget is spent on floor maintenance

4lb
of soiling is carried in to your building per 1000 people entering every week

30
tons of dirt, soot, grit and grime enters London's buildings daily*

#1
cause of accidental slips and trips is tracked in dirt and moisture

94%
reduction in dirt and moisture ingress by using Dust Control Mats

≤90%
of soiling can be stopped with correctly sized and placed matting

* Camraso Statistics

The Intelligent Approach to Dirt Control

Primary Mat: Removes coarse grit, heavy soil and some initial moisture, reducing dirt ingress and cutting cleaning costs.

Secondary Mat: Absorbs some moisture and removes additional grit, protecting your staff and visitors.

Tertiary Mat: Soaks up excess residue to ensure footwear is as clean and dry as possible before entering the main part of the building.

3

A final mat designed to remove residual moisture ensuring shoes are as clean and dry as possible

2

A high moisture retaining surface that captures any remaining grit

1

Abrasive and durable surface designed to remove grit and initial moisture

Slip and trip accidents on wet floors can result in a variety of injuries, including sprains, fractures, and head injuries. In some cases, these injuries can be serious or even fatal.

For Leisure and Hospitality

Mats are vital in the leisure and hospitality sector, serving various purposes from the classic entrance mats maintaining cleanliness and creating a positive first impression to specialist mats in various locations throughout the facility. Mats that provide comfort for employees standing for long periods, safety mats preventing accidents in areas like pools or fitness centers. Mats that maintain hygiene in food service areas. Functional mats that benefit your business, your staff and your guests.

For Warehousing and Manufacturing

Mats in the warehousing and manufacturing sector contribute to worker safety, comfort, and floor protection. They provide anti-fatigue support, prevent slips and falls, control static electricity, resist chemicals, and safeguard against heavy equipment and machinery. Using graphic mats we can also enforce safety messages where needed. All these mat types enhance productivity, reduce workplace injuries, and help maintain a clean and efficient working environment.

Standard Entrance Mats

Make an Entrance

Kleen-Tex's indoor entrance mats are a high-quality and durable solution for keeping your indoor spaces clean and safe. These mats are designed to trap dirt, dust, and moisture from shoes, effectively reducing the amount of dirt and debris that is tracked into your building.

Made from top-grade materials, our indoor entrance mats are built to last and can withstand heavy foot traffic, making them ideal for use in high-traffic areas such as lobbies, hallways, and entrances.

With a wide range of colors, sizes, styles and materials to choose from, you're sure to find the perfect mat to suit your needs and complement your interior styling.

So, whether you're looking to improve the appearance of your building or keep it cleaner and safer, Kleen-Tex indoor entrance mats are a great solution.

Standard Entrance Mat Ranges

Indoor

Functional mats designed to serve as a barrier between the outdoors and the indoors, preventing dirt, dust, and moisture from being tracked inside, keeping floors clean and free from slips and trips.

Outdoor

Our Outdoor range features durable and hardwearing products capable of withstanding the varying and harsh weather conditions outdoor use can bring.

Eco

It's everybody's responsibility to do as much as possible to help save our planet and preserve the environment we live in for generations to come.

Our Eco range includes products made with sustainability in mind. These products will feature both a surface and backing material made from recycled content.

Indoor

Iron-Horse

KLEEN-TEX COMMERCIAL PRODUCT GUIDE 2024 | STANDARD ENTRANCE MATS

Professional, washable dirt catching mat for commercial use

Durability and a high capacity for dirt capture make this mat the perfect choice for highly frequented areas such as entrances, corridors, lift doors and reception desks. A wide color choice will ensure a great match with your interiors.

Highly Recommended

"FC United of Manchester are delighted with the mats supplied by Kleen-TEX. The mats are very bright and visual and have created a warm and welcoming environment as soon as you step inside Broadhurst Park Stadium.

We have received lots of feedback from our supporters and visitors coming to the stadium to ask if we can create smaller replica mats, we can sell in our club shop!

We would like to thank Kleen-TEX for supplying these stunning mats and would highly recommend to other businesses and venues."

F. Fielding
Commercial Manager, FC United of Manchester

Excellent Statement

"The Jet Print logo mats produced by Kleen-TEX are of the highest quality. The mats are durable, effective, and hard-wearing, whilst the graphics are sharp and vibrant, making an excellent statement for any business' public image."

J. Pritchard
Ginger Mats Limited

Highest Standard

"We have been working with Kleen-TEX for nearly 20 years and always found the quality of mats to be of the highest standard, matched only by their ever efficient service level".

L. Brownless
Absolute Hygiene Solutions

Custom Printed Mats

Tap into the commercial power of
your under-used surfaces

Jet-Print Outdoor

Make a Statement

With Kleen-Tex's custom printed mats, you have the opportunity to transform empty spaces into a dynamic and effective marketing tool. Not only do our products offer effective protection against dirt, dust, and moisture, but they also serve as a powerful platform for conveying important messages to your customers, harnessing untapped potential.

When someone enters a room or building, their eyes instinctively look down to assess the safety of their surroundings. This means that with a custom printed

mat, you can reach up to 99% of people who enter your premises with a memorable and impactful message. Whether it's promoting your brand, showcasing special offers, or warning of potential hazards, the possibilities are endless.

With Kleen-Tex's state-of-the-art printing technologies and exceptional color reproduction, you can be sure that your custom printed mat will be eye-catching, innovative and effective.

Custom Printed Ranges

Indoor

Bold and vibrant mats that can be personalised with your unique artwork or message to add a touch of individuality to your entrance.

Outdoor

Tough and lasting floor coverings specifically designed to be located where the outdoor elements can degrade lower quality products.

Work Surface

For the highest quality printed image on a functional advertising mat, our Work Surface range offer pin-sharp clarity with no compromise.

Color Palettes

Kleen-Tex's 66-color Jet-Print palette offers an extensive range of vibrant and eye-catching hues allowing for unparalleled customization and design possibilities. With an impressive selection of colors, ranging from subtle neutrals to bold and dynamic, we have every color needed to reflect your vision. Our advanced Jet-Print technology ensures exceptional color accuracy and sharpness, resulting in stunning floor coverings that are aesthetically pleasing whilst remaining durable and functional.

Jet-Print Fabric Bases

Our custom printed products range features a variety of surface finishes which will accept color slightly differently depending on the material. It's important to thoroughly check your colors before placing your order to ensure a strong contrast between different elements of your design. Additionally, if you're uncertain about how the colors will appear on the specific surface material, we advise that you check a physical sample. These can be ordered at any time from our Customer Service team.

Fitted Entrance Systems

High performance systems for commercial applications

Matrix Tile

Elevate Your Entrance

Step into the world of premium entrance systems with Kleen-Tex. Our high-performance entrance systems are engineered to perfection and built to last, making them the ultimate solution for any high-traffic public entrance.

Whether it's tile systems or grid systems, we've got you covered with a variety of textures, colors, and solid rubber finishes to choose from. And the best part? All our systems can be customized to meet your specific needs and design requirements.

At Kleen-Tex, we're not just about creating durable and functional entrance systems, but also about making a positive impact on the environment. That's why we're dedicated to reducing plastic waste while helping professionals take their commercial projects to the next level of environmental efficiency.

So, whether you're looking to enhance the safety and durability of your public entrances or make a sustainable choice, look no further than Kleen-Tex.

Fitted Entrance Products

Tile System

Easy to install and can be cut to any size, our tile systems are perfect for many commercial applications where dirt removal is a high priority.

Anti-Fatigue Mats

Prevent problems caused by prolonged standing

Kleen-Comfort Standard • 2' x 3'

Wave Goodbye To Tired Feet

A workforce that spends a lot of time on its feet is susceptible to back and joint damage, so it makes both common and economic sense to protect employees from the stresses and strains of standing up to work.

Specialized anti-fatigue mats not only provide cushioning for your feet and joints, but they can also help improve your overall posture and reduce the risk of workplace injuries.

In addition to the physical benefits, anti-fatigue matting can also improve workplace safety by reducing slip and fall accidents. With their non-slip surfaces, these mats provide a secure footing for employees, even in wet or slippery conditions.

Investing in anti-fatigue matting is a smart choice for any employer looking to prioritise the health and safety of their workforce.

Anti-Fatigue Products

Industrial

Mats designed to reduce discomfort and fatigue caused by prolonged standing in industrial settings. Made from durable materials, these mats are easier to keep clean in messy workplace environments.

Office

Mats designed to enhance comfort and combat fatigue in office settings. Made to boost productivity and employee well-being, making them valuable additions to any office.

Did you know?

- **80% of individuals who work in a standing upright position** suffer from problems with their legs and/or back, with 30% of absenteeism attributed to back pain.
- Using an anti-fatigue mat during 8 hour working days **reduces tiredness and increases standing comfort by 50%** in comparison to a hard floor.
- Use of an anti-fatigue mat can **increase productivity in employees by up to 44%**.

The 100% rubber anti-fatigue mat for industrial areas

A durable rubber mat that provides excellent traction and fatigue relief for your muscles and joints at the same time. The cushioned inner construction promotes excellent anti-fatigue properties and its surface texture and low profile edges convey a better grip.

Wet Area Mats

Durable and hygienic modular solutions with practical uses

Kleen-Tile • Dark Blue

Create secure, hazard free working environments

Wet area tiles are a high-quality flooring solution designed specifically for wet and moisture-prone areas such as locker rooms, swimming pools, and spa facilities.

Made from durable and slip-resistant materials that provide excellent traction, they're easy to clean and maintain, making them an ideal choice for high-traffic areas.

Our selection of tiles are available in a range of colors and styles, allowing you to create a customized look that matches your decor. A preformed interlocking system makes them quick and easy to install in any space, shape or size.

With their high performance and stylish appearance, Kleen-Tex's wet area tiles are an excellent choice for any space where moisture is a concern.

Typical Applications

- » Poolside
- » Wet rooms
- » Locker rooms
- » Shower rooms
- » Saunas

Speciality Mats

Unique solutions for non-traditional areas

Kleen-Car

Safety and Cleanliness

Our specialty mats are the perfect solution for anyone looking to enhance safety and maintain a clean environment in non-traditional areas. With their high-performance capabilities and stylish appearance, these mats offer a reliable defense against accidents caused by slips, trips, and falls.

Whether you're in an industrial, commercial, motor vehicle, or office environment, our mats provide the protection you need to maintain a well-kept space while ensuring the safety of both customers and employees.

Speciality Products

Car Mats

Mats are designed to protect vehicles and maintain cleanliness. They offer traction and act as a barrier against potential hazards, ensuring the safety and cleanliness of vehicles, making them essential for any car owner.

Sanitary Mats

Keeps floors clean and sanitary while controlling odors in restroom environments. Mats hold unwanted moisture and inhibits the growth of bacteria and fungi responsible for creating smells and staining.

Messaging Mats

Mats give patrons and staff directions and instructions while keeping them safe from conditions that may cause accidents or harm. Many mats to choose from for right message when needed.

*2 year guarantee under industrial laundry conditions. For all mats we reserve the right of production-related tolerance of +/- 3% in size. Colors are subject to commercial tolerance.

Our Commitment to Sustainable Manufacturing

We acknowledge our duty to continuously enhance the sustainability of our products and operations as a leading global producer of floor matting systems. We recognize the importance of consistently improving the environmental impact of our offerings and the way we conduct our business.

Procuring Recycled Materials

As we actively seek recycled materials to incorporate into our products, we are diligently working to find ways to responsibly dispose of our products when they reach the end of their life. This commitment to sustainability applies to all of our home and commercial brands under the Kleen-Tex umbrella.

For example, our solid rubber mats can be re-crumbled for use in new products to reduce the consumption and processing of new raw materials.

We are also continuously exploring how we can extend our dedicated range of floor matting systems that are manufactured from recycled materials, including 100% **ECONYL®** regenerated nylon made from post manufacture and post consumer waste.

Our EcoAbsorb product is manufactured from **Renycle™ 50** recycled yarn, which, compared to standard yarn, saves energy, reduces CO₂ emissions, reduces water consumption and reduces waste material during production.

Our EcoAbsorb floor matting system also dries 37% faster than a cotton mat, saving valuable energy, time and money during laundry cycles.

In some products we utilise fabric constructed from 100% recycled PET plastic bottles and nitrile rubber with 15% recycled content.

Reducing Our Carbon Footprint

As part of our commitment to reducing our carbon footprint, we are also implementing a range of initiatives.

From a logistical standpoint, we are actively consolidating our deliveries to ensure that full truckloads are sent, eliminating any empty shipping space. Additionally, we have decreased the frequency of staff travel and instead increased the utilization of conference call technology and remote work with virtual offices.

We are striving to minimize waste throughout our global operations by recycling whenever possible and sourcing from suppliers within the same region.

Adopting efficient processes

ISO 14001:2015 is implemented throughout all aspects of our operations and we are continuously identifying how we can increase our operational efficiencies across all aspects of our business.

This includes a reduction in packaging and pallet use, the introduction of recyclable packaging and increasing our use of renewable energy throughout our supply chain.

We aim to recycle 100% of post manufactured waste by 2025 globally and are currently achieving 88% of our target.

Versatile Production Capabilities

Quality, service and flexibility are our watchwords and we take enormous pride in our ability to deliver even the most complex bespoke order quickly, efficiently and on time.

Our entire production process, from tufting to bonding, takes place at our manufacturing location in Poland, which means that we have full control over production schedules and can offer fast and accurate delivery timescales to suit all requests.

We have direct links between all our customer sales teams and our production site, allowing for excellent communication and accurate delivery timescales.

Product Samples

We've gone to great lengths to ensure the colors illustrated in this brochure are as true as possible, however, due to the nature of the printing process, some color variations may naturally occur. We strongly advise you to ask for our color samples prior to finalizing an order, This provides you the option to select from original colors and see the structure of our pile.

Labels and Embossing

Kleen-TEX offers a labelling and embossing service for all rubber-backed mats, enabling you to personalise your mats with your company details and messages.

Production of your individual labels or embossing plates takes up to three weeks from design approval.

Minimum order quantity for mats with labels is 250.

Border Labels

For your website or logo on the front side of the mat.

White Back Labels

White stripe on the back of the mat. You can mark them with a water-proof felt pen, to mark inventory numbers or internal information etc.

Back Labels

For your company logo, washing instructions, mat descriptions etc. on the back of the mat.

Embossing

Embossing the back, for example for your company logo etc.

Velcro

The primary purpose of velcro is to secure mats in place. To achieve this, one part of the velcro (the hook) is attached to the floor where the mat will be placed, and the other part (the loop) is integrated into the mat's backing. By connecting the two parts, the mat becomes fixed to the floor. This solution is particularly useful in areas where there is high foot traffic and frequent passage of shopping carts over the mat. Available in 4" x 4" squares.

Data Chips

The option to incorporate data chips is available for storing specific information about a mat.

During the manufacturing process, we will incorporate the data chips provided by the customer into the mat. To indicate the position of the data chips externally, an additional label can be placed on the mat backing above the chip location.

Data microchips are highly efficient and boast a remarkable durability. Our sales team will gladly provide further guidance and recommendations.
